

FOR IMMEDIATE RELEASE

Corporate Responsibility: 13th Annual Nature Generation Eco-Golf Classic

Solutions By Design II, LLC (SBD) attended the golf tournament in support their annual charity event

VIRGINIA, June 6, 2017 – The Nature Generation's (NatGen) Mission, "seeks to inspire and empower youth to make a difference environmentally by enriching their experience with nature and outdoor projects. As they become adults they will think and care about the footprint they, their family, and business make." Through Teach Green, Read Green and many more programs, the Nature Generation educates our children and encourage them to look at expanding their studies into the fields of sustainability, environmental science, alternative energy, and green technology.

For the third year in a row, SBD sponsored and participated in one of their keystone fundraising events in the Washington, DC area. The 13th Annual Eco-Golf Tournament, benefiting the Nature Generation, raises awareness and funds for innovative environmental stewardship programs in literature, science, and the arts for our nation's youth.

SBD came in 1st place, and this year's event raised over \$100,000 to help carry out their mission!
