

FOR IMMEDIATE RELEASE

Solutions By Design II, LLC; Software Development & Systems Engineering reappraised at CMMI Maturity Level III

Vienna, Va. – August 15, 2018 – Solutions By Design’s (SBD) Software Development & Systems Engineering unit today announced that it has been reappraised at level 3 of the CMMI Institute’s Capability Maturity Model Integration (CMMI)®. The appraisal was performed by Advanced Network Technology Solutions, Inc (ANTS Corp) from Aug 8 – 10, 2018 at the SBD headquarters in Vienna VA.

CMMI is a capability improvement framework that provides organizations with the essential elements of effective processes that ultimately improve their performance.

The reappraisal at maturity level 3 indicates the SBD is performing at a “defined” level. At this level, processes are well characterized and understood and are described in standards, procedures, tools, and methods. The organization’s set of standard processes, which is the basis for maturity level 3, is established and improved over time.

CMMI Institute (CMMIinstitute.com) is the global leader in the advancement of best practices in people, process, and technology. CMMI Institute’s promise is to inspire cultures of continuous improvement that elevate performance and create a sustainable competitive advantage.

Earlier this year in June, ANTS Corp assisted SBD to conduct surveillance audits of our Services Management System, ISO/IEC 20000-1:2011 and Information Security Management System, ISO/IEC 27001:2013. Similarly, SBD worked with SRI to conduct the Quality Management System, ISO 9001:2015 surveillance audit at the end of May. All audits were completed successfully with no non-conformances and identification of several strong areas in the respective systems.

ABOUT SBD: SBD specializes in IT system modernization and support as an application transformation and agile process leader. We leverage open source technologies and cloud-based solutions to reduce operating costs and advance the value proposition of automated solutions. We also have a robust cybersecurity capability optimizing security operation centers through the use of workflow automation, technical expertise, and the use of leading-edge security tools. Bottom line, we deliver technically innovative, reliable, and cost-effective solutions, services, and products to our federal customers.
