

FOR IMMEDIATE RELEASE

Solutions By Design II, LLC Awarded DLA Richmond Cabling Support

Solutions By Design II, LLC to support the DLA for new and ongoing telecommunications installation projects

Vienna, Va. - December 21, 2017 – The U.S. Department of Defense’s (DoD) Defense Logistics Agency (DLA) has awarded Solutions By Design II, LLC (SBD) a task order to support the Information Operations group. SBD has provided new and ongoing telecommunications installations, and supports all DLA facilities within a 250 mile radius of the Defense Supply Center Richmond (DSCR) in Richmond, VA.

SBD brings highly respected industry experts with extensive DLA experience to provide AV/VTC engineering and support services to the Richmond Support Services contract. The team comes with 20+ years of experience working within the DLA, and previously supported the agency’s migration to a fully VOIP-based telephone system – an integral part of the nation’s military defense.

“This contract win spotlights SBD’s strong background in Enterprise Infrastructure capabilities,” said Rod Volz, Vice President, Solutions By Design II, LLC. “We are proud to continue our support of the Defense Logistics Agency’s mission-critical goals to provide an agile, global DoD network.”

SBD has been supporting telecommunications projects for the Defense Logistics Agency since 2012 and is committed to delivering critical IT and mission support services to help our clients enhance the safety and security of our nation. SBD continues to combine extensive customer expertise with innovative, high-quality, and value-driven solutions enabling DLA to focus on their very important mission.

ABOUT SBD: SBD is a management consulting and technology services company serving clients domestically and abroad. For over 30 years, we have delivered technically innovative, reliable, and cost-effective solutions, services, and products to our federal customers. Using Agile processes and principles, SBD has helped transform government agencies to implement faster, more reliable quality systems and solutions to enable them to deliver their mission more effectively and efficiently.
