

## **FOR IMMEDIATE RELEASE**

### **Solutions By Design II, LLC to Provide Enterprise IT Services Support to the U.S. Securities and Exchange Commission (SEC)**

**Vienna, Va. – December 12, 2018** – Solutions By Design II, LLC, a leader in technology architecture and software engineering services, announced that it has been awarded a multi-billion dollar indefinite delivery indefinite quantity (IDIQ) contract as a part of the team. As a subcontractor to Ascella Technologies, the team has been awarded the U.S. Securities and Exchange Commission’s (SEC’s) ONE OIT (Office of Information Technology) contract.

The OIT-wide strategic sourcing vehicle will provide a streamlined process for the SEC to procure the comprehensive suite of IT services and solutions needed to support its mission of protecting investors and maintaining fair, orderly markets. SBD will apply its user-focused approach to IT solutions to facilitate innovation and support the SEC’s modernization efforts with a focus on information security and application management and development.

“Enabling our customers to meet their missions through creative approaches to IT delivery is important to SBD, and we see great opportunity to help SEC more efficiently achieve its objectives as an agency,” said Clyde W. Goldbach, Jr., Senior Executive Vice President, Solutions By Design II, LLC. “Through this project, SBD looks forward to leveraging our deep expertise in cybersecurity and application development, our consultative approach to business solutions and robust delivery excellence program to help SEC achieve its mission with technology.”

Earlier this year, the SEC—the agency that enforces federal securities (stocks, bonds, etc.) laws—announced its intention to overhaul its approach to IT services acquisition. Through the ONE OIT contract, the SEC aims to accelerate acquisitions and reduce costs by consolidating hundreds of IT contracts into three unrestricted awards and 15 contracts for small businesses.

As part of the Ascella Team, SBD will facilitate innovation and support SEC's modernization efforts in the following service area channels but not limited to Application Management and Development, Business Solutions Delivery, IT Infrastructure and Operations Management, Information Security, Data Management, IT Governance, Technology Business Management.

**ABOUT SBD:** SBD specializes in IT system modernization and support as an application transformation and agile process leader. We leverage open source technologies and cloud-based solutions to reduce operating costs and advance the value proposition of automated solutions. We also have a robust cybersecurity capability optimizing security operation centers through the use of workflow automation, technical expertise, and the use of leading-edge security tools. Bottom line, we deliver technically innovative, reliable, and cost-effective solutions, services, and products to our federal customers.
